REVISED October 5, 2018 DUE TO SYSTEM ADDITION

To: The Chair and Members of the Commission

From: Toni Loper, Public Utilities Analyst

Subject: IN THE MATTER OF THE APPLICATION OF RENAULD HOUSE FOR
CERTIFICATION AS AN ELIGIBLE ENERGY RESOURCE UNDER THE
DELAWARE RENEWABLE ENERGY PORTFOLIO STANDARD
(Filed December 31, 2013 – **Revised October 5, 2018**)- PSC Docket No. 13-510/18-
1112

Application:

The Renauld House (the "Applicant") filed an application with the Commission on December 31, 2013 and **revised October 5, 2018** seeking approval, pursuant to 26 Del. C. § 351 -363, for the certification of their generation unit located at 29757 Oliver Wolcott Drive, Millsboro, DE 19966.

Staffs Review:

Pursuant to 26 Del. C. § 351 – 363, the Commission issued Order No. 6931, dated June 6, 2006, which adopted the Rules and Procedures to Implement the Renewable Energy Portfolio Standard ("Rules" or "Regulation"). The Rules require that Retail Electricity Suppliers comply with the Renewable Energy Portfolio Standard ("RPS") through the filing of Renewable Energy Credits (RECs) created in PJM-EIS Generation Attributes Tracking System ("GATS"). RECs are created in GATS by Generation Units which are certified by the Commission as Eligible Energy Resources. Upon designation as an Eligible Energy Resource, the Generation Unit's owner shall be entitled to one (1) REC for each megawatt hour of energy derived from Eligible Energy Resources. The Commission through its Staff will certify Generation Units as Eligible Energy Resources based on the definition of Eligible Energy Resources found in Section 1.0 of the Rules. Staff has reviewed the application for compliance with the requirements of 26 Del. C. § 351 -363 and the Rules.

Staffs Findings:

According to the application, the Generation Unit is located within the PJM control area at 29757 Oliver Wolcott Drive, Millsboro, DE 19966. The Generation Unit's fuel type is Solar with a 0.00898 MW rated capacity. The Applicant's facility is Customer-Sited Generation and uses a Net Meter (Digital). At this time, the Applicant has no other PJM-EIS GATS State Certification Numbers assigned to this facility.

Staffs Recommendation:

Staff recommends that the following State of Delaware Certification Number be assigned to Applicant's facility for use in PJM-EIS GATS:

Renauld House DE-98282-SUN-01-0W
SYSTEM ADD-ON (Not Separately Metered)

The fourteen-digit State of Delaware Certification Number is consistent with the GATS identification system. The first two letters represent the state that is certifying the facility. The next five digits identify the facility. The following three letters represent the Eligible Energy Source on which RECs from the facility are based. The next two digits indicate whether the facility meets the definition of a New Renewable Generation Resource, which is defined as an Eligible Energy Resource first going into commercial operation after December 31, 1997. The last two digits indicate whether the facility is eligible for any bonus REC or SREC multipliers as designated in Title 26 of the Delaware Code.

Conclusion:

From the date of this Memorandum, the above State of Delaware Certification Number shall be deemed approved and is to be used in accordance with the PJM-EIS GATS for use in creating RECs or SRECs. It is the applicant's or its designee's responsibility to register the Eligible Energy Resource in GATS, using this Delaware Certification Number, in order for SRECs or RECs to be created. The GATS home page is <http://www.pjm-eis.com/> its contact information is: Hotline: 610-666-2245, Toll Free Number: 1-877-750-GATS, E-mail: gatsadmin@pjm-eis.com
